

EAA Seminar
Solvency II in a Nutshell
9/10 December 2013 | Budapest, Hungary

Organised by the EAA - European Actuarial Academy GmbH in cooperation with the Hungarian Actuarial Society

1. Introduction

Solvency II is set to become the new capital adequacy regime for the European insurance industry. This year has seen the long-term guarantee assessment (LTGA) which played a major role in understanding how the new regime could affect the insurance industry going forward. The EU institutions are currently in the process of agreeing how to most effectively use the results of the LTGA and draw the right conclusions for Solvency II.

The new regime will establish a revised set of EU-wide capital requirements and risk management standards that will replace the current solvency requirements for all 28 member states. The Solvency II requirements are set out in three pillars covering capital requirements (Pillar 1), governance and risk management requirements (Pillar 2), and reporting and disclosure requirements (Pillar 3).

2. Participants

The seminar is open to all interested persons, such as actuaries, risk and capital managers and controllers from all types of insurance companies, consultants or supervisors. Participants only need to have a basic understanding of Solvency II.

3. Purpose and Nature

The aim of this seminar is to provide participants with an in-depth introduction to all aspects of Solvency II, covering all three pillars. The seminar will be of interest for anyone who wants to

increase their overall knowledge of Solvency II, regardless of their experience or position in the company. At the end of the course, participants will have a comprehensive set of course material that will provide a valuable continuing reference resource.

The seminar will also provide participants with an insight of current Solvency II progress and expected timelines for the future development and implementation of the framework.

4. Lecturers

Dr. Zeljko Strkalj

Zeljko Strkalj is a Principal with The Boston Consulting Group and has more than 11 years of experience working in the insurance industry. Zeljko has advised some of the world's largest insurers and reinsurers on various strategic and actuarial topics and helped a number of large companies with their implementations for Solvency II. Prior to joining BCG, he worked at Milliman and Ernst & Young. He started his career as Product and Pricing actuary at Allianz. Zeljko is a member of the German Actuarial Association (DAV) and has presented frequently at industry conferences and published articles in insurance magazines. He regularly lectures on seminars of the European Actuarial Academy.

Dr. William Coatesworth

William Coatesworth is an actuarial consultant at Milliman who has become a leading commentator on Solvency II across Europe. He has helped a number of companies with their preparations for Solvency II, particularly focusing on the corporate governance and reporting requirements under pillars 2 & 3, as well as working with industry bodies to help draft the industry responses to the developing Solvency II regulations. William sits on the Solvency II Pillar V working group of the Groupe Consultatif, tasked with providing actuarial comment and challenge on pillars 2 & 3 on behalf of the various European actuarial associations. William is the author of a number of papers concerning Solvency II and has spoken at a number of industry events across Europe and Asia on the subject.

5. Language

The language of the seminar will be English.
