

CALL FOR SPEAKERS

ECA 2024: Managing uncertainty in a changing world

Assessing risks sustainably for the well-being of society

Actuaries traditionally assess and manage uncertainties and risks based on specific mathematical models and data. These skills have become more and more important in recent times – not only in traditional fields, but also way beyond. Therefore, for its 5th European Congress of Actuaries, the Actuarial Association of Europe invites all interested actuaries, experts and academics to discuss a broad selection of current professional challenges and opportunities arising from our changing world:

Artificial Intelligence and Data Science

- Successful use cases of Predictive Analytics applications
- Questions and solutions around the AI Act
- Supervision of AI applications
- Methodological contributions in AI and DS
- The actuarial role in Data Ethics

Sustainability

- Sustainability reporting
- Climate risk related scenarios
- The “actuarial” S and G in ESG
- Green investment

Accounting

- Learnings from the implementation of IFRS17
- User experiences and use cases
- Making IFRS and national accounting work

Products and product development

- Modern product development
- Classic products in a changing world (P&C, Life, Health)
- Sustainable pensions

Emerging risks

- Role of actuaries in modelling Cyber Risk
- Operational risks

Supervision

- Learnings from the Solvency II review
- Future of Solvency II
- Current developments around IORP II

Actuarial profession

- Education and learning
- Acting in conflicts of interest
- Professionalism

Abstract submission procedure

The ECA 2024 Program Committee welcomes abstracts, especially on the mentioned topics and to other topics of material interest to the actuarial community in Europe **until 31 October 2023**

The presentations for the congress program will be selected **by 15 November 2023**.

Please submit your abstract via the homepage www.eca2024.org -> [Call for Speakers](#)
