Details

This is a "must" for the International Actuarial Association Scientific Sections. The AFIR/ERM Section mission focuses on actuarial and financial research on Finance, Investment and Enterprise Risk Management fields. Over the last years these scientific fields are increasingly innovating their contents and consequently the dynamics of the actuarial profession are rapidly changing. The Colloquium offers the best chance for calling on academics, actuaries and other experts and for sharing ideas and experiences, discussing new key issues, creating a global network of researchers dedicated to advance the Actuarial Science also with the aim of delivering a "sustainable" future for the actuarial profession.
