

CALL FOR PAPERS

EUROPEAN
ACTUARIAL
DAYS

2 & 3 June 2021

Due to the ongoing COVID-19 pandemic the Actuarial Association of Europe (AAE) will run the first European Actuarial Days 2021 (EAD 2021) as an online-only conference to offer a unique CPD event for all interested actuaries.

The AAE invites all experts on 2 & 3 June 2021 to discuss the current professional challenges and opportunities arising from new areas of activity of the profession as well as from traditional work areas. We will put a special focus on the environment actuaries work and operate in and the fast development of this surrounding in the recent past and expectations for the future.

Abstract submission procedure:

The EAD 2021 Program Committee welcomes abstracts, especially on the mentioned topics until **31 March 2021**. The presentations for the online conference program will be selected by 15 April 2021.

Emerging Risks: Identification, Taxonomy and Mitigation

- What role do actuaries play in developing cyber risk coverage?
- What kind of new financial risks do we expect?
- How to deal with them?
- What kind of health related risks have an impact on traditional insurance or set off new products?
- How to model biometric risks in the aftermath of a pandemic?
- Climate and environmental risk, sustainability and actuaries: How to make use of our specific knowledge?

Manage Uncertainty in Data

- Is more data always better?
- Structured data vs. unstructured data: Where do we stand?
- Can data be unreliable?
- How to rate expert judgement based on available data?

Wider Use of Actuarial Skills

- Actual use cases: In which fields 'actuarial knowledge and expertise' can be of great value?
- What kind of skills help actuaries from outside of the own environment?

Back to the Roots: New Approaches in Traditional Fields

- How to make use of new techniques in traditional actuarial areas like pricing, reserving and solvency)?
- How to best evaluate customer behaviour and what can we learn from it?
- When do the advantages of big data and granularity override the basic foundations of insurance?
- What did we learn after the pandemic from the actuarial and/or the risk management view?

And further relevant actuarial topics ...
